Ogbon Akpoyovwire(Akpos)

Full-Stack Developer | Cybersecurity Practitioner

SKILLS

Web Development: JavaScript (ES6+), Node.js, Express.js (learning), React, Supabase (PostgreSQL backend), Git, GitHub,

Databases: PostgreSQL (via Supabase), SQL (CRUD, Joins, Queries)

Cybersecurity: OWASP Top 10 (XSS, SQLi, Path Traversal), Web App Penetration Testing (Burp Suite, PortSwigger Labs), Network Security (Firewall Configuration, Subnetting, Routing, Wireless Security), Packet Sniffing (Wireshark), Secure Coding Awareness, Threat Modelling, Bash Scripting, Virtualized Labs (VMware, Kali Linux), HackTheBox & TryHackMe (Ongoing)

TOOLS

Postman, GitHub Desktop, Google Search Console, Chrome DevTools, Canva, Wireshark, Burp Suite, VMware

EXPERIENCE

Todo API – *Practice Project*

Backend Developer | Node.js · Express.js · Supabase

2025

- Developed a REST API for managing tasks (CRUD operations).
- Integrated PostgreSQL via Supabase for secure data persistence.
- Tested endpoints using Postman and implemented input validation.

DuetDays – *Personal Project*

Frontend + Backend Developer | React · Node.js · Supabase (PostgreSQL)

<https://preview--duet-days.lovable.app/> | 2025

- Built a live productivity tracker with user authentication and real-time task storage using Supabase (PostgreSQL).
- Connected React frontend to Supabase backend with API calls for authentication and database operations.
- Implemented backend features using Supabase queries and Node.js client libraries.

- Indexed app on Google with Search Console to improve SEO and discoverability.

NIIT, Port Harcourt – *Penetration Testing*

Penetration Testing | Web Application Security | Network Security 2025

- Conducting penetration testing and OWASP Top 10 assessments on live targets (niitph.com)
- Using Burp Suite and PortSwigger Labs to test for XSS, SQLi, and Path Traversal
- Practicing firewall configuration, packet sniffing with Wireshark, and basic threat modelling.

EDUCATION

NIIT, Port Harcourt – *Diploma in Software Engineering*

2023 – 2025

- Completed a 2-year course covering full-stack development concepts, including web technologies, programming languages, and databases.
- Gained hands-on experience through labs, logic-building, and real-world assignments.

NIIT, Port Harcourt – *Intro to Cybersecurity Program*

2025(5 Months)

- Covered secure coding, OWASP Top 10 vulnerabilities, cyber hygiene, and common web threats.
- Hands-on practice with Burp Suite, Wireshark, VMware, and Kali Linux

LANGUAGES

English, Urhobo
